

Going to a Hospice House? What to expect...

Who

Your 24-hr Care Team:

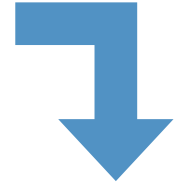

- Doctors • RNs • CNAs
- Social Workers • Pharmacists
- Chaplains • Volunteers

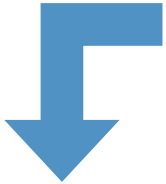

Why

Pain & Symptom Management

Our standard of excellence is to relieve symptoms as soon as possible to the patient comfortable and at ease.

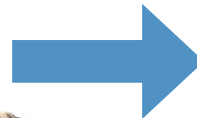

Where

One of our 4 Hospice Houses: Legacy, Brandley, Estelle's or Syliva's
Inpatient care—no fees (covered by Medicare, Medicaid, private insurance, etc.)
Routine care—room and board fees apply

What

Professional care in a warm homelike setting with freshly prepared meals for patients in their private rooms. Visitors are encouraged, including the four-legged kind! Visiting hours are only limited by the patients' needs.

When

Hospice Houses are designed for acute short-term stays. While 61% of our patients do pass at a house, our goal is to return the patient home (wherever that may be) with hospice care.

Each patient is unique; each one is cared for individually.
